Register with a invalid Email	SignUpPage	User fills all registration fields with invalid email and submits	Stay in the same page	Remains the same page
Register with same Email	SignUpPage	User fills all registration fields with same email and submits	stay in the same page	Remains the same page

Test Scenario	Page	Action Description	Expected Result	Actual Result
View all boards	BoardsPage	User navigates to 'View All Boards' section	Board list is displayed	Board list visible
Create board	DashboardPage	User clicks on 'Create Board', enters name, and submits	New board is added and visible on dashboard	Board successfully created
Create card	CardPage	User creates a card on a board list	Card is created and visible in the list	Card successfully created
Edit card	CardPage	User edits the card title and description	Card fields are updated and saved	Card updated successfully
Delete card	CardPage	User deletes an existing card	Card is removed from the list	Card deleted successfully
Cancel card creation	CardPage	User initiates card creation and then cancels	No card should be created	Card creation canceled successfully
Add member to board	BoardDetailsPage	User opens add member form and invites by email	Member should receive invitation	Invitation sent (assumed successful), if already added will give a message
Tag card	CardPage	User assigns a tag (e.g., "urgent") to the card	Tag is displayed on the card	Tag added successfully

Also have many clicks events which have checked but not mentioned separately.

Problems:

- 1.Board and list can not be deleted.
- 2.Use Utc time
- 3.only email checking with @ no need any .
